

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

CHILDE HASSAM

CHILDE HASSAM'S heritage, his Puritan ancestry, with the downright qualities that such ancestry engenders, has had much to do in shaping his career. He was born in Boston in 1859, with an American ancestry dating back to 1631, when his forbears settled in Dorchester. This is indeed a sturdy background, for the force that was needful in Puritan conviction can be transposed very easily into artistic effort. And as one will find that from Whistler's forbears in Lowell a great artistic force found something to lean upon, so these ancestors of Childe Hassam have given him that intangible something, that very personal individual force, that stamps things indelibly.

Bred into his art is this vigorous quality, this New England thoroughness. And how essentially American his work is! He has absorbed the European influence of his younger days and stands alone profoundly American. This "national integrity" is without doubt the great need of American art to-day. This quality in the case of Hassam seems his birthright, for he is a Puritan.

The masculine quality in Hassam's work is to be observed. One is conscious that the work is the outcome of vigor that is not afraid to confront the elements. The connection between the picture and subject seems most direct. They are not so-called studio pictures. He paints in the open. So many of his pictures have taken great physical effort to execute, yet one never finds signs of

drugery. He loses the signs of labor in the joyful brushwork in which he is unequalled. These are qualities of the master.

He has a way of taking his own where he finds it, and thus he leaves the stamp of his personality on localities where he has worked. Take Gloucester for example. Before I had seen Hassam's pictures, it seemed a fishy little city, now as I pass through it I feel Hassam. The schooners beating in and out, the wharves, the sea, the sky, these belong to Hassam. Just as one cannot go to Venice and be very far from Whistler. There are many other spots that he has made his own: but one of these in great contrast to Gloucester is Fifth Avenue. This street he has done at various times, and over a long period. Back in the days when hansom cabs and victorias were in evidence, then with the automobile, precisely mechanical, traffic congested, and with racial crowds of the clothing shops. The most daring effort was to paint the Flags. No one had ever painted flags before, so now when one thinks of flags one thinks of Hassam's flag pictures. These pictures were not garish affairs but were filled with the poetry of patriotism. He made the Flags symbols of his heritage. Only a Puritan could have painted flags as he did.

There are many other fields that he has invaded and made his. Flowers in gardens, flowers in still life, flowers as accessories to portraits. These are painted with great tenderness, great restraint of color yet very colorfully, always part of the picture, never jumping out in forced contrast. Interiors are his,—interiors that are renderings of space with a magic play of light, the light that instinctively seems to be the heritage of Hassam. From a cool room through a Dutch door is a light, warm, out-of-doors

—with all the characteristics held in restraint. One feels the joy that must have been his in these fine performances.

Then there are doorways of the days of long ago. Colonial doorways of rare proportion, and these are choicely done quite as skillfully as the other pictures, for Hassam is no specialist. Village streets with hot sun and cool shadow, elms that are elms with slow-moving wind-swayed tops. You feel the street, and you feel the elms, you feel the quality of the objects portrayed.

Hassam feels very keenly what he does. The approach is never languid—there is a sharp decision made in his mind at each stroke of the brush. This tends to carry his impression home very forcibly, and gives the passages that crisp fresh living quality.

His etching interests me deeply, for I know how difficult the mastery of this great art is, especially to the artist whose habit has been in the field of color. It requires linear perception and an utter absence of fear towards the medium which is really formidable. for the uncompromising copper and steel point are not very sympathetic. What Hassam has done in etching is very remarkable. In less than a decade he has become an etcher. His etchings are as individual as are his paintings.

He had things to express and he expressed them in his own manner, without fear of his medium. Etching is a test of an artist's ability for in this precise method his weaknesses are revealed. Hassam took the most difficult course. He drew the plates cleanly letting each line remain to tell its story. He then printed the plates as few etchers dare to print, namely, with a clean wipe. This method reveals all to the experienced collector of prints. Nothing is hidden by false surface ink.

Hassam's lithographs are another triumph. Not heavy

crudities with impossible black smudges as are so many efforts of our modern lithographers: but light crisp renderings of fearless decision. Whistler was right. A lithograph should be "blonde."

The real Hassam will never be found in written eulogy—but in his pictures. Go to them, observe them carefully and then you will find what cannot be described, that intangible something, the charm of the true artist. Hassam is a Puritan and he paints American pictures—and furthermore Hassam is himself.

ERNEST HASKELL.
